

April 3, 2008

John W. Marriott III, CEO  
Marriott International  
Marriott Drive  
Washington, DC 20058

Dear Mr. Marriott:

Current government and privately-conducted statistics conclusively prove that the explosion of pornography is having a very negative effect on our society.

We ask that Marriott cease making these movies available to its guests.

This request is in complete compliance with your public commitment to "Human Rights," your statement of "promoting the well-being of children and families," and your stated stance against "...such tragedies as human trafficking and the exploitation of children."

The following co-signers of this letter are leaders of some of the largest pro-family organizations in America. On behalf of these groups, a few of our principals would appreciate the opportunity to meet with representatives from Marriott to discuss this matter further.

Sincerely,

Donald E. Wildmon
